Flashforge Burndown Chart Sprint 3

Sprint Burndown   Nov 18, 2024 - Dec, 01 2024

— Actual Burndown   — Ideal Burndown

Notes:
- Tasks and subtasks assigned to team members on November 17th
- Significant progress was made to start the second week.
- Most user stories dedicated to sprint 3 completed by the 30th. Extra user story was completed early on December 1st to make this sprint more significant.

Velocity Changes:
The velocity in sprint 3 was more consistent and higher than that of sprint 2. Sprint 3 contained more difficult tasks, an equal distribution of said tasks and dedicating days to refining them led to a chart with points deducted in bursts. This was a result of one task being worked on for multiple days rather than the completion of smaller tasks quickly that was done in sprint 2.
